Summary

Data Engineer with 1.5+ years of experience designing and operating large-scale distributed data systems on Azure cloud. Specialized in building resilient batch and streaming data platforms using Apache Spark and Databricks. Experienced in designing lakehouse architectures, optimizing data pipelines for performance and reliability, and implementing enterprise-grade data governance and quality frameworks.

Education

Sathyabama Institute of Science and Technology, Chennai

Sep 2020 – May 2024

Bachelor of Engineering in Computer Science and Engineering

CGPA: 8.54

Experience

Persistent Systems Ltd. | Software Engineer

Hyderabad, India

Project: UHG 3RDD – Informatica to Databricks Migration (Healthcare/Insurance) March 2026 – Ongoing

- **Tech Stack:** *Azure Databricks, PySpark, Delta Lake, SQL, Informatica*
- Developed a reusable PySpark validation framework spanning DDL checks, row-count reconciliation, E2E SUBTRACT, column-level drill-down, deduplication, and XML source-to-target validation, cutting framework build time from weeks to days.
- Designed and optimized 38+ Databricks notebooks for automated validation across 90+ healthcare and insurance tables, including XML inbound checks, improving consistency and accelerating SIT/UAT delivery.
- Implemented Oracle-to-Databricks reconciliation logic using incremental timestamp filtering, batch-level deduplication, and tolerance-based comparisons to validate large-volume datasets at scale.
- Performed PySpark/SQL root-cause analysis via joins, aggregations, and data profiling to resolve duplicate records, transformation mismatches, and source-to-target discrepancies, contributing to zero escalations.

Persistent Systems Ltd. | Software Engineer

Pune, India

Project: Cencora – Databricks Migration (Healthcare/Pharma Domain)

May 2025 – Feb 2026

- **Tech Stack:** *Azure Databricks, PySpark, Azure Data Factory, ADLS, SQL, Azure DevOps*
- Built Bronze-layer ingestion pipelines for an enterprise-scale Azure Databricks migration, supporting Raw Ingestion, Reporting, and Standardized Views PODs with end-to-end source-to-target validation.
- Contributed to Medallion Architecture (Bronze → Silver → Gold → Standardized) implementation, adding schema enforcement and automated consistency checks for production-grade data quality.
- Deployed an ICEDQ-based data quality framework (count, null, duplicate, PK checks), reducing pipeline failure rate by 30%.
- Designed incremental/full-load pipelines with checkpointing and audit logging; optimized Delta Lake partitioning to improve downstream query performance.

Revature Consultancy Pvt. Ltd. | Trainee Software Engineer

Chennai, India

Project: Spotify Music Trends Analysis

March 2025 – May 2025

- **Tech Stack:** *Azure Data Factory, Azure Databricks, PySpark, ADLS, Unity Catalog, Entra ID*
- Built ADF-based ingestion pipelines to extract playlist and track metadata from Spotify REST APIs, processing large-scale music datasets across 50+ genres and regions.
- Designed a 3-tier ADLS data lake (Raw → Clean → Curated) and developed PySpark transformation jobs in Databricks to detect listener behavior trends and music consumption patterns.
- Implemented Unity Catalog for data governance and enforced Entra ID-based RBAC, ensuring secure, role-specific access across the entire data pipeline.

Technical Skills

Languages: Python, SQL

Cloud & Data Platforms: Azure (ADF, ADLS Gen2, Azure Databricks, Delta Lake, Unity Catalog, Entra ID)

Big Data & Processing: Apache Spark, PySpark, ETL/ELT, Batch & Streaming Pipelines, Incremental Loads

Data Architecture: Medallion Architecture, Lakehouse Architecture, Data Lake Design

Orchestration: Azure Data Factory

Databases: MySQL, PostgreSQL, SQL Server (SSMS)

Tools & Libraries: Informatica, ICEDQ, Pandas, NumPy, Git, GitHub, VS Code

Certifications

- Databricks Certified Data Engineer Professional [View Credential](#)
- Databricks Certified Data Engineer Associate [View Credential](#)
- AWS Certified AI Practitioner [View Credential](#)
- Google Cloud Generative AI Leader [View Credential](#)
- Microsoft Azure AI Fundamentals (AI-900) [View Credential](#)

Leadership / Extracurricular

- 3rd Place holder in National Level Technical Symposium — Silicon-2K22 (Techno Summit).
- Member of Google Developer Student Club — Sathyabama University.
